THE RECOMMENDATION

Growth ($3,500) + Studio ($750) = $4,250/mo at launch.

Multi-region athleisure with serious AI ambitions and a video-content library cannot live on Starter. Enterprise on day one over-charges and under-utilises. Growth + Studio is the right shape — and Studio is non-negotiable: editors need a way to maintain the practice library, the closet content, and the moderation queue.

WHY STARTER IS DISQUALIFIED

Single-platform / 5-screen / no-AI is incompatible with the proposition.

STARTER CONSTRAINT	TITIKA REALITY
Single platform (iOS or Android)	Both — CA/US lean iOS, HK is mixed, wider Asia leans Android.
5 screens	Phase 1 scope is ~18 screens, including the Practice library.
No AI	Fit Atelier, practice recommender, multilingual translation are core to the value.
24h email support	Multi-region brand needs faster response — drop cadence + Asia ops timing.

If the brand pushes for Starter on price, walk away. We'd lose money supporting them and they'd hate the result.

WHY GROWTH FITS PHASE 1

The features map exactly to what the proposal needs.

GROWTH FEATURE	WHAT IT DELIVERS FOR TITIKA
Both stores, RN + Expo	Single codebase serves CA/US/HK/Asia mixed-OS reality. OTA matches drop cadence.
Claude Sonnet + Haiku	Sonnet powers the Fit Atelier in EN + 繁中. Haiku batches "wear-it-three-ways" copy and translation.
RevenueCat	Future-proofs subscription practice content (pro tier) without a re-architecture.
Apple + Google sign-in	Activewear customers won't fill forms. Friction kills installs.
ASO quarterly	"Lululemon alternative", "yoga leggings Hong Kong", "活動服" all matter.
2 releases / month	Drop cadence + Practice content updates demand a regular rhythm.
Shared Slack, 4h response	Right level for a premium athleisure brand at launch.

STUDIO ADD-ON ($750/mo)

Mandatory. The brand cannot run a Practice library without it.

Titika has more editorial volume than the other clients — practice videos, instructor profiles, multi-region drops, ambassador content moderation. Studio is more critical here, not less. Don't make it optional.

COMPONENT	REAL COST / MO	MARGIN NOTES
Web hosting	$20–40	Often shared with mobile API
DB delta	$5–15	Same Postgres
Object + video storage	$15–60	Practice video library is the swing factor — Bunny / Mux
Editorial AI (translation drafts, three-ways copy, moderation classifier)	$40–100	Higher than other clients due to video moderation + 4 languages
Email + push	$10–25	Two regions, multilingual
Auth (~30 internal seats — editors, instructors, ambassadors, ops)	$0	Free tier on Supabase / Clerk
Subtotal infra + AI	**~$90–240**	**Higher than other clients due to video**

MARGIN AT $750/MO

Real cost ~$160/mo (mid-band). Includes ~5 maintenance hrs/mo + Studio releases aligned with mobile cadence. Gross margin ~75% before maintenance hours consumed. If video volume grows fast (Phase 2 live classes), watch for a $1,000/mo tier conversation in Year 2.

STUDIO ONE-TIME BUILD COST

Roughly **$35–50K** on top of the mobile build. 9 modules in Phase 1: auth + closet/passport editor + practice library admin + drop scheduler + ambassador admin + Tribe moderation + concierge + returns/fit dashboard + Phase 1 analytics. Higher end of range due to video upload + transcoding pipeline.

WHY ENTERPRISE IS PREMATURE

Three reasons to hold the upgrade for now.

1. Native modules aren't needed yet

Phase 1 has no AR. RN delivers everything in scope. Native Swift/Kotlin matters when AR fit visualisation goes live in Phase 2.

2. Wholesale portal is Phase 2

SSO + audit logging + RLS hardening are needed when real B2B comes online. Phase 1 ambassador program doesn't need it.

3. Asia residency not yet contractual

HK is a peer market but not yet at the volume that triggers contract clauses. Cross that bridge when the partner asks.

4. SLA mismatched to launch

1h response 24/7 (Enterprise) is for live-revenue partners. At launch the web store carries the revenue. 4h is right.

YEAR-2 UPGRADE TRIGGERS

Move them to Enterprise the moment any one fires.

TRIGGER	WHY IT FORCES THE UPGRADE
AR fit visualisation goes live	Cloth-drape on body silhouette needs native Swift / Kotlin modules.
Wholesale / ambassador B2B portal	SSO, audit logging, RLS — required for real B2B.
Asia data-residency clause	HK / wider-Asia volume becomes contractually material.
24/7 1h SLA	Major retailer or platform partner makes uptime a contract clause.
Cathay co-branded experience	If Asia Miles partnership escalates to a real co-branded product, expect Cathay to demand Enterprise-grade contract terms.

LIKELIHOOD BY MONTH 12

AR: **medium-high** — natural fit for an athleisure brand and the next-gen story. Wholesale: **medium**. Asia residency: **medium** — depends on PIPL evolution. Cathay: **low-but-large-if-it-lands**.

DEAL-MAKING TACTICS

How to anchor and protect the conversation.

- **Lead with Growth + Studio as a single $4,250 number.** Don't separate them in the pitch — they're inseparable in practice.
- **Frame the Fit Atelier as the ROI argument.** 5 points off return rate = real revenue. The whole subscription pays for itself if the AI works.
- **Pre-negotiate the Enterprise upgrade path.** Lock the upgrade fee in Year 1.
- **AI overage clause is non-negotiable.** The Fit Atelier in 4 languages is heavily used. A viral Instagram moment can 10× usage in a weekend.
- **Video storage scale-out clause.** If practice library grows past 200 sessions, video CDN cost is passthrough +20%.

WHAT WE DON'T SAY OUT LOUD

Internal-only notes.

REPUTATION RISK TO MANAGE

Body-data territory. Never collect weight or BMI. If the AI ever recommends size based on photo, get explicit consent and never store the photo. One misstep here is a viral story.

MARGIN TARGET — COMBINED

Growth tier infra+AI cost at expected MAU (~10K active in Year 1) is $1,000–1,400/mo. Plus Studio at ~$160/mo. At combined $4,250/mo we're at 60–75% gross before maintenance dev. Tighter than other clients due to video storage. Watch.

UPSELL SEQUENCING

Don't propose AR fit at the same time as the Phase 1 contract. Land Growth + Studio, deliver the Fit Atelier well, *then* propose AR as the trigger for Enterprise. Earn the upgrade.

WALK-AWAY SIGNALS

If they push back on AI overage + Studio + Enterprise upgrade pricing simultaneously, that's a sign they want flat fixed-fee pricing forever. Multi-region athleisure can't be supported that way at this price. Be willing to walk.

RECOMMENDED ASK

Growth ($3,500) + Studio ($750) = $4,250/mo for Year 1. Pre-negotiated Enterprise upgrade. AI overage at cost +20%. Video CDN passthrough +20% above 200 sessions. Brand-side content approval. $35–50K Studio build inside Phase 1.

Right tier for a multi-region athleisure brand with a Practice library and a real Asia footprint. The Fit Atelier alone justifies the spend.
