

PLATFORM INVESTMENT

An app that grows with you.

Predictable to start. Fair as you scale.
Aligned with how the app earns its keep.

Prepared for · The Erth to Erth team

Scope · Platform fee for the mobile app — hosting, AI, monitoring, on-call, OS updates

Excluded · One-time build (separate proposal). Payment processing, shipping & tax passthrough.

THE PHILOSOPHY

You should pay for what the app delivers, not for what it might.

Most software vendors charge a flat fee that's expensive when you're starting out and a bargain once you've scaled. We've inverted it. The platform fee is light at launch — when the app is still earning your customers' trust — and grows only as active use grows.

Predictable

A fixed monthly floor. You always know the minimum.

Aligned

Variable cost only kicks in when active customers are using the app — i.e. when it's working for you.

Honest

Per-MAU rate is calibrated to cover real cloud, AI, and email costs your active users generate.

THE STRUCTURE

One floor. One slope. No surprises.

PLATFORM FLOOR

\$500 / mo

Includes everything required to keep the app running for up to 1,000 monthly active users — hosting, AI, push, monitoring, OS-required updates, and security patches.

USAGE — ABOVE 1,000 MAU

\$0.30 / MAU

Pay only for active customers above the included 1,000. Covers the cloud, AI calls, and email each engaged user generates.

WHAT THIS LOOKS LIKE

At every stage of growth.

Sample monthly platform fee at common scale points. The build fee is one-time and separate.

STAGE	MONTHLY ACTIVE USERS	MONTHLY PLATFORM FEE	PER ACTIVE USER
Pilot	500	\$500	\$1.00
Launch	1,000	\$500	\$0.50
Early growth	2,500	\$950	\$0.38
Established	5,000	\$1,700	\$0.34
Strong adoption	15,000	\$4,700	\$0.31
At scale	25,000	\$7,700	\$0.31

Per-MAU cost falls as you grow. The first thousand customers carry the floor; every customer after benefits from it.

WHAT'S INCLUDED

The platform fee covers everything.

- **Hosting & infrastructure** — application servers, database, object storage, CDN, push notifications, transactional email.
- **AI features** — fit assistant, recommendations, visual search, garment-passport summaries, repair triage. All caching and optimisation included.
- **Monitoring & on-call** — error tracking, uptime monitoring, weekday business-hours response to critical issues.
- **OS-required maintenance** — Apple and Google deprecate APIs roughly twice a year. We handle the updates so the app keeps working.
- **Security patches** — dependency updates and security advisories, applied as released.
- **One small feature request per quarter** — a UI tweak, a new screen, a copy change. Larger work is scoped separately.
- **Quarterly review** — a half-day session covering metrics, customer feedback, and the next quarter's priorities.

FAIR TERMS

Three commitments to keep the relationship healthy.

30-day exit

Either side can end the agreement on 30 days' notice. The relationship is renewed every month by mutual fit, not by lock-in.

Your data, your accounts

Source code, customer data, AI logs all live in your cloud accounts. We have no leverage except being useful.

AI overage cap

If AI usage spikes beyond 100,000 calls per month, anything above is billed at our cost +20% — never a margin grab.

WHAT'S NOT INCLUDED

Passed through at cost or scoped separately.

- **App-store fees** — Apple's \$99/yr developer programme and Google's one-time \$25 fee, paid on your accounts.
- **Payment processing** — Shopify and Stripe fees on transactions, paid at standard rates.
- **Shipping & label APIs** — for take-back, repair, and resale flows. Pass-through at cost.
- **Major new features** — Phase 2 and Phase 3 work is scoped as separate engagements with their own fixed fees.
- **Marketing & ad spend** — entirely yours to direct.

THE OFFER

\$500/mo to start. \$0.30 per MAU once you're past 1,000. 30-day exit, always.

One number to start. One slope as you grow. The cost of the platform stays in line with the value the app is delivering — and we share the same incentive to keep it that way.
