

INTERNAL · NOT FOR CLIENT

Tier rationale Cocokind.

Growth + Studio at launch.
Lighter regulatory than Moon Juice. Sharper
transparency story.

Audience · Internal only

Use · Reference for the conversation; never share with the brand

Status · Draft for discussion · cosmetic-rule alignment with brand legal required before contract

THE RECOMMENDATION

Growth (\$3,500) + Studio (\$750) = \$4,250/ mo at launch.

Cocokind is operationally lighter than Moon Juice (no Rx-interaction territory) but has a stronger transparency moat to protect — Sustainability Facts labels are the brand's signature. The Studio's Facts editor + ingredient library + compliance review queue are the architecture that protects it.

DIFFERENT FROM THE OTHER CLIENTS

What's specific to Cocokind.

1. The brand has stopped using "clean" and "sustainable"

Priscilla publicly rejected those terms. The app must respect that — every claim defined, cited, or absent. No fuzzy language.

2. Sustainability Facts labels are the moat

Per-product LCA, packaging breakdown, ingredient source. The Studio's Facts editor is doubly important here — it's not just content, it's the brand's competitive position.

3. Lighter regulatory exposure than Moon Juice

FDA cosmetic rules apply but no Rx interactions. AI guardrails simpler; legal review still mandatory for cosmetic-claim language.

4. Heavy retail (Target, Whole Foods)

Customer can buy at retail and never visit the website. App must surface across channels — store finder, scan-to-routine, omnichannel registration.

WHY STARTER IS DISQUALIFIED

Same as other brands — single-platform, 5-screen, no AI.

STARTER CONSTRAINT	COCOKIND REALITY
Single platform	Both — DTC + Target + Whole Foods customer base mixed iOS/Android.
5 screens	Phase 1 is ~18 screens including Facts, Match, Routine, Refill.
No AI	Studio chat, Match → Routine, ingredient explainer are core to value AND compliance.
24h email support	Sensitivity / ingredient questions need same-day response.

The Facts editor + ingredient library + compliance queue together form the brand's transparency backbone.

Heavier than apparel clients due to LCA citation management + Sustainability Facts label authoring; lighter than Moon Juice due to no Rx interaction database.

COMPONENT	REAL COST / MO	MARGIN NOTES
Web hosting	\$25–50	Often shared with mobile API
DB delta (Facts, ingredient citations, refill ops)	\$10–25	Higher than apparel due to relational complexity
Object storage (Facts label images, product photography, packaging guides)	\$10–25	
Editorial AI (Facts drafts, ingredient summaries, translation, compliance pre-screening)	\$30–80	Compliance pre-screen adds cost
Email + push (refill reminders, routine nudges)	\$10–25	Higher tx volume from refills
Auth (~25 internal seats)	\$0	Free tier on Supabase / Clerk
Subtotal infra + AI	~\$85–205	Between apparel (~\$140) and Moon Juice (~\$260)

MARGIN AT \$750/MO

Real cost ~\$145/mo (mid-band). Includes ~5 maintenance hrs/mo. Gross margin ~70–75%. Healthy.

STUDIO ONE-TIME BUILD COST

Roughly **\$35–50K** on top of the mobile build. 9 modules in Phase 1: auth + Facts editor with citation manager + ingredient library + compliance review queue + Routine library + Match rules engine + drop scheduler + refill ops dashboard + concierge + analytics. Citation manager + LCA data integration are the differentiators vs apparel clients.

YEAR-2 UPGRADE TRIGGERS

Move them to Enterprise the moment any one fires.

TRIGGER	WHY IT FORCES THE UPGRADE
Esthetician B2B portal	Partnered estheticians with white-label client tracking — SSO + audit logging + RLS hardening.
Photo skin analysis at scale	Health-data adjacency — Enterprise audit logging required.
EU expansion makes data residency contractual	GDPR + EU CSRD-style sustainability disclosure rules tightening.
AR product try-on	Native modules for stable on-face AR.
24/7 SLA from Target / Whole Foods / Sephora	Major retail partner makes uptime contractual.

LIKELIHOOD BY MONTH 12

Esthetician portal: **medium-high**. Photo skin analysis: **medium**. EU residency: **medium** — CSRD pushes this. AR: **medium**. Realistic timeline to Enterprise is 12–18 months.

DEAL-MAKING TACTICS

How to anchor and protect the conversation.

- **Lead with Priscilla's published stance on "clean."** Show that we built the app around her intellectual honesty, not despite it. Differentiates from competitors pitching her with vague promises.
- **The Sustainability Facts editor is the killer demo.** Show how the Studio publishes a per-product Facts label citation-linked to LCA reports.
- **Pre-negotiate the Enterprise upgrade path.** 12–18 month timeline.
- **AI overage clause is non-negotiable.** Studio chat in 2 languages with compliance pre-screening is non-trivial cost.
- **Brand-side review on every customer-facing claim.** Cosmetic-rule sensitive language (e.g., "fades dark spots", "barrier repair") needs editorial sign-off.

Internal-only notes.

REPUTATION RISK TO MANAGE

The brand's whole credibility is "we publish what others won't." One AI-invented sustainability claim that doesn't trace to an LCA report is a viral story. Insist on brand-side compliance review of every Facts statement and every ingredient claim.

MARGIN TARGET — COMBINED

Growth tier infra+AI cost at expected MAU (~8K active in Year 1) is ~\$1,000–1,400/mo. Plus Studio at ~\$145/mo. At combined \$4,250/mo we're at 60–70% gross before maintenance dev. Healthy. Watch the AI line.

UPSELL SEQUENCING

Don't propose esthetician portal at Phase 1. Land Growth + Studio, deliver Facts + Routine + Refill well, prove the compliance posture, *then* propose Enterprise + esthetician portal as the next step.

WALK-AWAY SIGNALS

(1) Brand pushes back on legal review of cosmetic claims. (2) Brand wants AI to make sustainability claims without LCA backing. (3) Brand resists ingredient-citation requirement. Any one of these = walk. The brand's reputation moat depends on this rigor.

RECOMMENDED ASK

Growth (\$3,500) + Studio (\$750) = \$4,250/mo for Year 1. Pre-negotiated Enterprise upgrade by month 12-18. AI overage at cost +20%. Brand-side compliance review on every customer-facing claim. \$35-50K Studio build inside Phase 1.

Right tier for a brand whose whole story is "we publish what others won't." The Studio architecture is the architecture that protects that story.
