

## PLATFORM INVESTMENT

# An app that grows with you.

Predictable to start. Fair as you scale.  
Aligned with how the app earns its keep.

---

**Prepared for** · The Erth to Erth team

**Scope** · Mobile app + Studio (web admin portal) — hosting, AI, monitoring, on-call, OS updates

**Excluded** · One-time build (separate proposal). Payment processing, shipping & tax passthrough.

## THE PHILOSOPHY

# You should pay for what the app delivers, not for what it might.

Most software vendors charge a flat fee that's expensive when you're starting out and a bargain once you've scaled. We've inverted it. The platform fee is light at launch — when the app is still earning your customers' trust — and grows only as active use grows.

### Predictable

A fixed monthly floor. You always know the minimum.

### Aligned

Variable cost only kicks in when active customers are using the app — i.e. when it's working for you.

### Honest

Per-MAU rate is calibrated to cover real cloud, AI, and email costs your active users generate.

## THE STRUCTURE

# One floor. One slope. No surprises.

#### MOBILE FLOOR

**\$500** / mo

Keeps the mobile app running for up to 1,000 monthly active users — hosting, AI, push, monitoring, OS updates, security patches.

#### STUDIO ADD-ON

**\$750** / mo

The web admin portal your team uses every day — passport editor, take-back queue, repair queue, drop scheduler, sustainability report.

#### ABOVE 1,000 MAU

**\$0.30** /

MAU

Pay only for active customers above the included 1,000 — covers cloud, AI calls, and email each engaged user generates.

Combined floor at launch · **\$1,250 / mo** · then +\$0.30 per MAU as the app grows.

# The brand's web admin portal. The internal twin of the app.

Catalog and orders stay in Shopify. The Studio owns everything new the app introduces — the lifecycle data, the queues, the loyalty ledger, the customer concierge.

| MODULE                              | WHAT YOUR TEAM DOES WITH IT                                                                                    |
|-------------------------------------|----------------------------------------------------------------------------------------------------------------|
| <b>Garment passport editor</b>      | Author materials, origin, factory, care, carbon-equivalent. Claude drafts; editors approve.                    |
| <b>Drop &amp; release scheduler</b> | Schedule drops, write push copy, restock alerts, geofenced events.                                             |
| <b>Take-back queue</b>              | Track parcels arriving at hubs, mark recycled, credit points on receipt.                                       |
| <b>Repair queue (AI-triaged)</b>    | Vision model classifies damage from photos; one-click DIY guide or atelier quote.                              |
| <b>Resale listings</b>              | Approve customer listings, set price floors, manage second-cycle GMV.                                          |
| <b>Loyalty admin</b>                | Tier overrides, comp credits, referral approvals, points ledger.                                               |
| <b>Concierge inbox</b>              | Customer escalations from the app — repair questions, recycle pickups, lost passports.                         |
| <b>Sustainability report</b>        | Audit-ready numbers — kg saved, items recycled, CO <sub>2</sub> e avoided. Export for marketing or regulators. |

WHAT THIS LOOKS LIKE

# At every stage of growth.

Sample monthly platform fee at common scale points. The build fee is one-time and separate.

| STAGE           | MONTHLY ACTIVE USERS | MONTHLY PLATFORM FEE | PER ACTIVE USER |
|-----------------|----------------------|----------------------|-----------------|
| Pilot           | 500                  | \$1,250              | \$2.50          |
| Launch          | 1,000                | \$1,250              | \$1.25          |
| Early growth    | 2,500                | \$1,700              | \$0.68          |
| Established     | 5,000                | \$2,450              | \$0.49          |
| Strong adoption | 15,000               | \$5,450              | \$0.36          |
| At scale        | 25,000               | \$8,450              | \$0.34          |

Combined fee includes mobile platform + Studio + variable above 1K MAU. Per-customer cost falls as you grow.

## WHAT'S INCLUDED

# The platform fee covers everything.

- **Hosting & infrastructure** — application servers, database, object storage, CDN, push notifications, transactional email.
- **AI features** — fit assistant, recommendations, visual search, garment-passport summaries, repair triage. All caching and optimisation included.
- **Monitoring & on-call** — error tracking, uptime monitoring, weekday business-hours response to critical issues.
- **OS-required maintenance** — Apple and Google deprecate APIs roughly twice a year. We handle the updates so the app keeps working.
- **Security patches** — dependency updates and security advisories, applied as released.
- **One small feature request per quarter** — a UI tweak, a new screen, a copy change. Larger work is scoped separately.
- **Quarterly review** — a half-day session covering metrics, customer feedback, and the next quarter's priorities.

## FAIR TERMS

# Three commitments to keep the relationship healthy.

### 30-day exit

Either side can end the agreement on 30 days' notice. The relationship is renewed every month by mutual fit, not by lock-in.

### Your data, your accounts

Source code, customer data, AI logs all live in your cloud accounts. We have no leverage except being useful.

### AI overage cap

If AI usage spikes beyond 100,000 calls per month, anything above is billed at our cost +20% — never a margin grab.

## WHAT'S NOT INCLUDED

# Passed through at cost or scoped separately.

- **App-store fees** — Apple's \$99/yr developer programme and Google's one-time \$25 fee, paid on your accounts.
- **Payment processing** — Shopify and Stripe fees on transactions, paid at standard rates.
- **Shipping & label APIs** — for take-back, repair, and resale flows. Pass-through at cost.
- **Major new features** — Phase 2 and Phase 3 work is scoped as separate engagements with their own fixed fees.
- **Marketing & ad spend** — entirely yours to direct.

## THE OFFER

\$1,250/mo to start (mobile + Studio).  
\$0.30 per MAU once you're past 1,000.  
30-day exit, always.

Two numbers to start. One slope as you grow. The cost of the platform stays in line with the value the app is delivering — and we share the same incentive to keep it that way.
