

INTERNAL · NOT FOR CLIENT

Tier rationale Free Label.

Growth + Studio at launch.

Fit AI is the killer feature; sizing it is the product.

Audience · Internal only

Use · Reference for the conversation; never share with the brand

Status · Draft for discussion

THE RECOMMENDATION

Growth (\$3,500) + Studio (\$750) = \$4,250/
mo at launch.

An apparel brand whose entire customer-acquisition pain is sizing. The Fit Finder + free size-swap workflow is the Studio's main job. Margin is in line with other apparel clients (Encircled, Kotn).

WHY STARTER IS DISQUALIFIED

Same as other apparel brands — single-
platform, 5-screen, no AI.

STARTER CONSTRAINT	FREE LABEL REALITY
Single platform	Both — CA/US customer base mixed iOS/Android.
5 screens	Phase 1 is ~18 screens including the Fit Finder flow alone.
No AI	Fit Finder, Lab chat, multi-language are core to the value AND to the return-rate reduction.
24h email support	Size-swap turnaround needs same-day response — slow response erodes the free-swap-as-feature promise.

Standard fit. Same as other apparel clients.

GROWTH FEATURE	WHAT IT DELIVERS FOR FREE LABEL
Both stores, RN + Expo	Single codebase. OTA matches small-batch drop cadence.
Claude Sonnet + Haiku	Sonnet powers Lab chat in EN/FR. Haiku batches care guides + translation.
RevenueCat	Future-proofs subscription bundle programs.
Apple + Google sign-in	Reduces install friction.
ASO quarterly	"Wire-free bra", "bamboo bra Canada", "size inclusive activewear" all matter.
2 releases / month	Drop cadence demands a regular rhythm.
Shared Slack, 4h response	Right level for an independent brand at launch.

STUDIO ADD-ON (\$750/mo)

Mandatory. Fit-Finder rules engine + Drop tracker + swap workflow form the brand's operational backbone.

Margin in line with other apparel brands.

COMPONENT	REAL COST / MO	MARGIN NOTES
Web hosting	\$20–40	Often shared with mobile API
DB delta (Fit-Finder rules, Drop tracker, swap log)	\$10–25	Higher than apparel due to sizing matrix complexity
Object + video storage (Comfort Lab videos × multiple cup sizes)	\$10–25	
Editorial AI (fit-finder rules, Lab content, translation)	\$25–60	
Email + push (drop alerts, swap status, restock)	\$10–25	Higher tx volume from drop launches
Auth (~15 internal seats)	\$0	Free tier on Supabase / Clerk
Subtotal infra + AI	~\$75–175	Standard apparel range

MARGIN AT \$750/MO

Real cost ~\$125/mo (mid-band). Includes ~5 maintenance hrs/mo. Gross margin ~75%. Healthy.

STUDIO ONE-TIME BUILD COST

Roughly **\$32–48K** on top of the mobile build. 9 modules in Phase 1: auth + Fit-Finder rules engine (the most complex single module — per-style algorithm with body comfort + brand anchor) + drop scheduler with batch tracker + swap workflow + Lab content admin + concierge + Free-tier admin + analytics.

YEAR-2 UPGRADE TRIGGERS

Move them to Enterprise the moment any one fires.

TRIGGER	WHY IT FORCES THE UPGRADE
AR fit visualisation goes live	Body silhouette AR needs native Swift / Kotlin modules.
Wholesale / boutique B2B portal	SSO + audit logging + RLS for boutique partners (Granville, etc.).
EU GDPR data-residency clause	EU storage + processing as European volume becomes material.
Photo-based fit check at scale	Body-photo data adjacency — Enterprise audit posture required.
24/7 1h SLA	Major retail / boutique partner makes uptime contractual.

LIKELIHOOD BY MONTH 12

AR: **medium**. Wholesale: **medium-high** — boutique conversations likely. Photo fit-check: **medium**. Realistic timeline 12–18 months to Enterprise.

DEAL-MAKING TACTICS

How to anchor and protect the conversation.

- **Lead with the return-rate ROI.** 6-point drop in returns on bras = real money. Fit AI funds the entire build in Year 1.
- **The Fit Finder is the killer demo.** Show the rules editor in the Studio. Walk through how a 36DD wired customer maps to L cup wire-free. Differentiates from competitors.
- **Pre-negotiate the Enterprise upgrade path.** Lock the upgrade fee in Year 1.
- **AI overage clause.** Lab chat in 2 languages with body-shape opt-in is non-trivial cost.
- **Brand-side approval on inclusivity content.** Trans/nonbinary fit guidance + plus-cup (G–L) confidence content needs editorial sign-off — protects the brand from misstep.

Internal-only notes.

REPUTATION RISK TO MANAGE

The brand's whole position is anti-shapewear, anti-body-shaming. One AI suggestion that reads as "slimming" or "flattering" is a viral story. Insist on brand-side review of every Lab chat reply about fit. Train the AI prompt to never use shape-modifying language.

MARGIN TARGET — COMBINED

Growth tier infra+AI cost at expected MAU (~5K active in Year 1) is ~\$700–1,000/mo. Plus Studio at ~\$125/mo. At combined \$4,250/mo we're at 70–75% gross before maintenance dev. Healthy.

UPSELL SEQUENCING

Don't propose AR + photo fit-check at the same time as Phase 1. Land Growth + Studio, deliver Fit Finder + Drop well, *then* propose AR as the trigger for Enterprise.

WALK-AWAY SIGNALS

(1) Brand wants "slimming" / "flattering" / "shaping" copy in the AI. (2) Brand wants fake-urgency mechanics in the Drop. (3) Brand pushes back on inclusivity content as default. Any one = walk.

RECOMMENDED ASK

Growth (\$3,500) + Studio (\$750) = \$4,250/mo for Year 1. Pre-negotiated Enterprise upgrade. AI overage at cost +20%. Brand-side approval on every fit / inclusivity / care claim. \$32-48K Studio build inside Phase 1.

Right tier for an independent brand whose value is fit-trust. The Fit Finder alone justifies the investment.
