

PLATFORM INVESTMENT

An app that tells the truth.

A right-sized partnership for launch —
mobile app + admin Studio, ready as one.

Prepared for · The Kotn team

Scope · Mobile platform + The Studio (web admin portal) — hosting, AI, releases, monitoring, on-call, OS-required maintenance

Excluded · One-time build (separate proposal). Payment processing, shipping, taxes — passthrough.

THE PHILOSOPHY

Right-sized for launch. Designed to grow only when the brand does.

You should not pay enterprise prices for an app that hasn't yet proven itself in market. You also should not have a launch tier that boxes in a values-led brand's ambition. Our recommendation balances those: a strong middle tier today, with a contractually-locked path to the highest tier the moment the brand is ready.

Predictable

A flat monthly fee for everything in the launch scope. No surprises during Year 1.

Aligned

The path to the next tier is locked in advance. You only pay more when the brand actually needs more.

Honest

If something is genuinely included, we say so. If something is passthrough or scoped separately, we say that too.

THE RECOMMENDATION

Growth tier + Studio add-on — \$4,250 / month — for Year 1.

MOBILE TIER

Growth

\$3,500 / mo

Both stores via React Native. Claude-powered AI. RevenueCat. Apple + Google sign-in. ASO quarterly. Two releases a month. Shared Slack with 4-hour response.

ADMIN PORTAL

The Studio

\$750 / mo

The internal-facing twin. Origin / passport editor with citation manager, education ledger, drop scheduler, concierge, transparency-report builder, analytics.

FUTURE TIER

Enterprise

from \$8,000 / mo

Native modules for AR provenance. Dedicated lead engineer + PM. Region-locked data residency (EU/UK). SSO, audit logging, RLS hardening. 24/7 SLA. Studio folds in.

The internal twin of the mobile app.

Catalog and orders stay in Shopify. The Studio owns everything new the app introduces — the provenance ledger, the impact data, the customer concierge, the transparency report.

MODULE	WHAT YOUR TEAM DOES WITH IT
Origin / passport editor	Author the per-piece provenance ledger — farm, mill, maker — with citation links to audits and certifications. Multilingual.
Translation workflow	EN-first; Claude drafts FR / AR; editors approve per locale; one-click publish.
Education ledger admin	Track schools funded, education-days, farming families supported. Audit-ready, citation-linked.
Maker dispatches	Curate stories from the Nile Delta with maker consent. Consent and privacy controls built in.
Drop & store-event scheduler	Region-aware drops, store events (block parties, mending workshops), push copy.
Concierge inbox	Atelier escalations, repair bookings, wholesale enquiries — one inbox, bilingual.
Transparency-report builder	Pulls from the impact ledger and produces a citation-linked annual report — exportable PDF, shareable to customers.
Analytics dashboards	Origin scan rate, wardrobe registration, repair conversion, regional adoption.

WHAT THIS LOOKS LIKE

At every stage of growth.

STAGE	MONTHLY ACTIVE USERS	MONTHLY PLATFORM FEE	PER ACTIVE USER
Pilot	1,000	\$4,250	\$4.25
Launch	5,000	\$4,250	\$0.85
Early growth	10,000	\$4,250	\$0.43
Established	25,000	\$4,250	\$0.17
Strong adoption	50,000	\$4,250	\$0.09

Combined fee covers mobile platform + Studio at every stage. AI overage above 100K calls/month billed at cost +20%. Per-customer cost falls dramatically as you grow.

When Kotn is ready, Enterprise is one decision away.

Five scenarios trigger the move to Enterprise. Each is a sign the brand has succeeded — and that the platform should match.

TRIGGER	WHAT ENTERPRISE UNLOCKS
Launching AR provenance overlay	Native Swift / Kotlin modules for stable on-garment AR.
Modernising wholesale & corporate gifting	SSO, audit logging, role-based access, row-level security.
EU / UK growth makes data residency contractual	Region-locked storage and processing for GDPR.
EU CBAM-readiness required	Enterprise-grade audit logging and data export for carbon-tariff compliance.
Major retail partner requires 24/7 / 1h SLA	Dedicated lead engineer + PM, on-call rotation, source-code escrow.

WHAT WE LOCK IN YOUR YEAR 1 CONTRACT

The Enterprise upgrade fee is set in advance, with no penalty for moving up. Any build credit accrued during Year 1 is prorated against the Enterprise tier. You decide when you're ready.

Three commitments to keep the relationship healthy.

30-day exit

Either side can end the agreement on 30 days' notice after the Year 1 term.

Your data, your accounts

Source code, customer data, AI logs, the impact ledger all live in your cloud accounts.

AI overage cap

If AI usage spikes beyond 100,000 calls per month, anything above is billed at our cost +20%.

BRAND-SIDE CITATION REVIEW

Every customer-facing provenance, impact, or maker claim is reviewed and approved by your editorial team before publish. AI generates; humans approve. Always. We never let the platform put your verifiable-provenance reputation at risk.

MAKER-PRIVACY CLAUSE

No precise GPS for farms or workshops. No real names without explicit maker consent. The app honours the people behind it.

WHAT'S NOT INCLUDED

Passed through at cost or scoped separately.

- **App-store fees** — Apple's \$99/yr developer programme and Google's one-time \$25 fee, on your accounts.
- **Payment processing** — Shopify and Stripe fees on transactions, at standard rates.
- **Audit certification fees** — BSCI, OEKO-TEX, BCI, etc. The Studio links to them; the certifications themselves are yours.
- **Phase 2 & Phase 3 build work** — AR provenance, wholesale portal, content-scaling all scoped as separate engagements.
- **Editorial content production** — maker dispatches, transparency-report writing, photography, video shoots are yours.
- **Marketing & ad spend** — entirely yours to direct.

THE OFFER

Growth + Studio · \$4,250 / month for Year 1. Pre-negotiated Enterprise upgrade folds Studio in. Brand-side citation review on every customer-facing claim. Maker-privacy clause. AI overage at cost +20%. 30-day exit after Year 1.

Right-sized for the launch. Right path for the success scenario. Built so the platform stays in service of the truth — never the other way around.
