

INTERNAL · NOT FOR CLIENT

Tier rationale The Ten Spot.

Growth + Studio at launch.

Multi-location franchise = highest Studio complexity in portfolio.

Audience · Internal only

Status · Booking-system integration scoped separately. Faster Enterprise upgrade likely.

THE RECOMMENDATION

Growth (\$3,500) + Studio (\$750) = \$4,250/ mo at launch.

First service-and-multi-location-franchise client in the portfolio. Studio is the most complex one we've built — RBAC for corporate vs franchise-owner, per-location pricing variation, technician scheduling, multi-location calendar. Faster path to Enterprise (12 months expected) due to Booker/Mindbody two-way sync at SLA-grade.

DIFFERENT FROM PRODUCT BRANDS

What's specific to The Ten Spot.

1. Booking is the product

Not e-commerce, not content. The customer comes for the booking. App quality = booking quality.

2. 33+ locations + franchise model

Multi-location calendar, per-franchise pricing variation, RBAC for corporate vs owner. Most operationally complex Studio.

3. Booking system integration is critical

Booker / Mindbody / current system — customer's existing tools. Don't replace; sync. Scoped as separate engagement.

4. Technicians are the product

The relationship between customer and tech is what brings retention. App must surface it (with tech opt-in for photo/bio).

STUDIO ADD-ON (\$750/mo)

Most complex Studio in the portfolio.
Margin holds because of high MAU.

COMPONENT	REAL COST / MO	MARGIN NOTES
Web hosting	\$30–60	Higher load: 33 locations of admin traffic
DB delta (multi-location calendar, per-franchise pricing, RBAC)	\$20–40	Highest of any client — multi-location data model
Object storage	\$5–15	Tech photos, location photos
Booker/Mindbody integration costs	\$25–80	API costs at SLA-grade; pass-through above quota
Editorial AI (translation EN/FR, prep guides)	\$25–60	Bilingual
Email + push (booking reminders, prep, after, cadence)	\$50–150	HIGHEST tx volume — recurring customer base × 33 locations
Auth (~150 internal seats — corporate + 33 franchise owners + technicians)	\$0–20	May exceed free tier; flat \$20/mo cap
Subtotal infra + AI	~\$155–425	Highest of any client to date

MARGIN AT \$750/MO

Real cost ~\$280/mo (mid-band). Tighter than apparel clients (~\$140) and Moon Juice (~\$260). Gross margin ~60%. Push for Enterprise upgrade by month 12 to recover margin.

STUDIO ONE-TIME BUILD COST

Roughly **\$45–65K** on top of the mobile build. Most complex Studio: 11 modules. Booking-system integration is separate (\$25–40K). Total Phase 1 build: **\$110–175K** (mobile + Studio + integration).

FASTER PATH TO ENTERPRISE

Likely 12 months. Don't fight it; price it in.

TRIGGER	WHY IT FORCES THE UPGRADE
Booker/Mindbody two-way sync at SLA-grade	Booking-critical app needs Enterprise SLA from month 6+.
Franchise-owner B2B portal at scale	33+ owners = SSO + audit logging + RLS hardening required.
Multi-state US data residency	As US expansion grows.
24/7 / 1h SLA	Multi-location franchise + booking-critical = uptime is contractual.
PCI compliance hardening	Gift card + membership payment volume.

DEAL-MAKING TACTICS

- **Lead with operational savings.** 10–15 hr/week per location of phone-bound staff time × 33 locations = \$200K+/year operational savings. Justifies the build immediately.
- **Booking-system integration as separate scope.** Don't bundle. Booker / Mindbody migration is its own 4–8 week project.
- **Per-franchise pricing transparency.** The Studio supports +/-15% variation per location. Show that on the demo.
- **AI overage clause.** Concierge chat at 33-location scale generates real volume.
- **Pre-negotiate 12-month Enterprise upgrade.** Lock the upgrade fee.

WHAT WE DON'T SAY OUT LOUD

REPUTATION RISK

The Ten Spot positions itself as "anti-spa" — comfortable, no judgment, accessible. One AI suggestion that makes a customer feel judged about her body or routine = brand-killer. Insist on brand-side review of every chat persona prompt. Train the AI to never suggest "you should also book X" — that's franchise upsell, not concierge.

MARGIN TARGET

Combined infra+AI ~\$280/mo. At \$4,250 we're at 60% gross at expected MAU. Tight. Plan to upsell Enterprise by month 12.

WALK-AWAY SIGNALS

(1) Brand wants AI to push franchise upsell ("you should book Y at Yorkville"). (2) Brand wants per-franchise unilateral pricing without master controls. (3) Brand wants laser/skin services positioned as medical treatment. Any one = walk.

RECOMMENDED ASK

Growth (\$3,500) + Studio (\$750) = \$4,250/mo for Year 1. Booking-system integration separately scoped (\$25–40K). Pre-negotiated 12-month Enterprise upgrade. AI overage at cost +20%. \$45–65K Studio build inside Phase 1. Total Phase 1: \$110–175K.

Right tier for a multi-location franchise with the largest customer base in the portfolio. Plan for Enterprise upgrade by month 12 — the architecture demands it.
